CAREER OBJECTIVE

Passionate frontend developer skilled in React, JavaScript, and Tailwind CSS. Focused on creating responsive, user-friendly interfaces with clean design. Eager to contribute to modern UI projects and grow with a collaborative team.

TECHNICAL & SOFT SKILLS

- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, DaisyUI
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Tools:** Git, Firebase, VS Code, Figma
- **Soft Skills:** Adaptability & Fast learning

PROJECTS

Newspaper Portal   **Live Link** | GitHub: Client | Server

A fast, responsive newspaper portal featuring category-based news browsing and article reading, built with a modern React-based frontend and a streamlined JavaScript backend—designed for smooth UX and easy deployment.

Category-based browsing & article viewing: Users can seamlessly navigate through news categories and read full articles with clean, responsive design using React Router and Tailwind CSS.

Fast development experience: Powered by Vite for blazing-fast hot-module reloading (HMR) and agile development cycles.

Firebase-ready deployment & hosting: Easy deployment configuration via Firebase Hosting on the frontend; backend set up for server-side news operations (e.g., news fetching, APIs) using Node.js (inferred from JavaScript backend).

Library Management App   **Live Link** | GitHub: Client | Server

A full-stack web app to manage a small library's catalog and records—browse, search, and maintain items with secure, role-ready authentication and a responsive UI. Built for fast CRUD workflows and simple deployment.

Book catalog with categories & details: Browse books by category with detailed descriptions and availability status.

Borrowing & return system: Users can borrow books, track borrowed items, and return them with proper updates.

Dynamic search & filtering: Quickly find books by title, author, or category with optimized search and filter options.

HobbyHub — Hobbio   **Live Link** | GitHub: Client | Server

A community-driven platform to discover, join, and create local hobby groups — lets users explore group details, become members, and create/manage their own hobby communities through a fast, responsive UI.

Group discovery & membership: Browse hobby groups, view detailed group info, and join as a member.

Group creation & management (CRUD): Authenticated users can create, edit, and manage hobby groups with details and images.

Role-based interactions: Differentiated access for users (e.g., members vs. creators) to manage and participate in groups.

EDUCATION & CERTIFICATION

Kurigram Polytechnic Institute - Diploma in Computer Science and Technology   2022-Present

Complete Web Development With Programming Hero   2025
Programming Hero | Remote   Certificate
